Robert O Young DSc, PhD, Naturopathic Practitioner · 9 hours ago · 2 min read

THE VACCINE DEATH REPORT – Millions Have Died From The Injections

October 13th, 2021 Robert O. Young CPT, MS, DSc, PhD, Naturopathic Practitioner

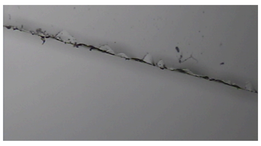
EVIDENCE OF MILLIONS OF DEATHS AND HUNDREDS OF MILLIONS OF SERIOUS ADVERSE EVENTS RESULTING FROM THE EXPERIMENTAL COVID INJECTIONS

The Vaccine Death Report shows all the scientific evidence that millions of innocent people lost their lives and hundreds of millions are suffering crippling side effects, after being injected with the experimental CoV - 19 injections. The report exposes the strategic methods used by governments and health agencies to hide 99% of all vaccine injuries and deaths. You will also learn who is really behind all of this, and what their true agenda is.

The report also shows horrifying lab results obtained by optical microscopy investigation of several vaccine vials: living creatures with tentacles, as well as self-assembling nanorobots. See the micrograph below of a Hydra vulgaris parasite viewed by Dr. Madej using optical microscopy at 600x:

Hydra Vulgaris Viewed Under Optical Microscopy by Dr. Madej

The Vaccine Death Report contains a tremendous amount of critical information, that you will find nowhere else in such a comprehensive and well organized format. It ends with a strong message of hope, that will greatly empower you.



Nano Particulates of Graphene and Iron Oxide Assembling Themselves in a Organized Straight Line Viewed by Dr. Robert O. Young under pFlow Contrast Microscopy

This report is a critical alarm call to the world. Download it now by clicking on the link below, and distribute it far and wide.

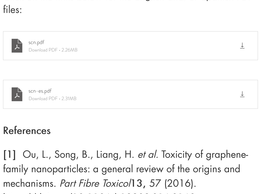
An Absolute Bombshell!

Major revelations on what is in the CoV - 2 - 19 vaccines, with the use of electron, pHase, dark field, bright field and other types of microscopy from the original research of Dr. Robert Young and his scientific team, confirming what the La Quinta Columna researchers found - toxic nanometallic content with magneticotoxic, cytotoxic and genotoxic effects, as well as identified life-threatening parasites. In addition, in 2008, Hongjie Dai and colleagues at Stanford University found graphene oxide.[1][2][3][4][5][6]



Mixed in a 0.5ml equelous fraction image from Pflizer vaccine sample viewed under pFlow contrast microscopy at 1000x, showing a symplast of graphene oxide (upper left) next to a Trypanosoma cruzi parasite (lower right). Dr. Robert O. Young, Hikari Omni Publishing, September 9th, 2021.[7]
